Product information
Hand Cleaning Paste

PI 31/11/02/2026

Description
Mild, pH-balanced hand cleaner based on wood flour, with skin-protecting ingredients. Free of solvents and formulated to be slightly acidic. Nevertheless, it remains within the skin-neutral range, as demonstrated in numerous dermatological tests. Thoroughly removes even heavy contamination such as oils, greases, tar, bitumen, printing inks, and more, without being too harsh on the skin.

Properties
- high capacity
- pleasant feel to the skin
- dermatologically tested
- protects and cares for the skin
- pH-neutral to skin
- good cleaning action

Technical data

Viscosity	pastelike
pH value	4,1 - 5,8
Density	0,8 g/cm³
Base	wood flour
Color / appearance	beige
Shelf life in original sealed container	24 months

Areas of application
For cleaning dirty hands.

Comment
SKIN COMPATIBILITY
Dermatologically tested, pH-neutral, and evaluated extensively by dermatologists. Proven effective thanks to its very high quality standards. The selected cleansing agents gently remove dirt while leaving the skin feeling pleasantly soft.

LEGAL REQUIREMENTS
Subject to the German Food and Consumer Goods Act (LMBG), the German Cosmetics Regulation (KVO), and the relevant EU cosmetics directives. It is therefore not subject to the German Chemicals Act or the German Hazardous Substances Ordinance. An EC safety data sheet is therefore not required.

ECOLOGICAL DATA
Liquid Hand-Wash Paste is not subject to the law on environmental compatibility according to the Washing and Cleansing Agents Act. However, the product complies with this law in regard to the required biodegradability for detergent-based materials.

STORAGE
In accordance with the Ordinance on Cosmetics, can be stored sealed in its original container at room temperature for at least 30 months.

ADDITIONAL SKIN PROTECTION INFORMATION
One in three people today suffers from allergies. Skin disorders are among the most common occupational diseases and can lead to an inability to work. The high concentration of harmful substances at the workplace requires special protective measures to be taken. The fat and moisture content of the skin are particularly important during the winter months. At this time of year, the humidity is very low since the cold air is unable to carry as much moisture as warm air. During this time, humans do not produce so much cutaneous fat. During frequent changes in weather, hands can easily become dry and cracked, which may also cause a whitish coating to appear on the skin. Where they can easily become unprotected, they must be given special care.

For information on proper skin care, see our Skin Protection Plan (item no. 6243).

Application
Rub the product into your dry or damp hands until the dirt loosens. Then add water and wash thoroughly. Rinse well.
