

Metallic High Gloss

Description

Protects, treats and seals metallic paintwork against negative climatic effects. For a radiant gloss. With long-term weather protection. Repels rain and dirt over long periods and increases the paint's resistance to environments. Tiny particles of wax are deposited even in the finest of microscratches, which they fill up to leave a perfect paint surface. Suitable for polishing machines.

and may be considered reliable, although not legally binding.

Properties

- radiant high gloss
- super-easy to polish
- protects against aggressive environmental influences
- excellent long-term protection
- suitable for machine polishing

Technical data

Color / appearance	green
Form	liquid
Odor	characteristic
Base	waxes
pH value	6,83
Density	0,98 g/cm ³
Flash point	> 65 °C
Viscosity at 40 °C	> 7 mm ² /s

Areas of application

Specially developed for metallic paints from new to matt. The original gloss is easily restored to weathered and matt paintwork. Suitable for machine polishing.

Application

First, thoroughly clean the surfaces to be polished and dry them carefully. Shake Metallic High Gloss Polish vigorously before use and pour onto a soft rag, polishing cloth or sponge. Apply thinly and evenly to the paint surface using light pressure and circular movements. Only treat one section at a time. Allow Metallic High Gloss Polish to dry until it forms a matt coat. Remove this and polish using a clean, dry cloth. Do not use under direct heat or on warm paint surfaces. Regular application gives the optimum results.
