

Motorbike Air Filter Oil

Description

Oil specifically designed for treating foam air filters. Reliably traps dirt and dust even under the most extreme conditions to protect from engine damage. Guarantees optimal air flow for maximum performance.

Properties

- long engine service life
- high wear resistance
- excellent adhesion
- waterproof
- improves filter properties
- binds dust and sand

Technical data

Density	0,798 g/cm ³
Form	liquid
Odor	characteristic
Flash point	15 °F
Color / appearance	blue

Areas of application

Suitable for use on all 2-stroke and 4-stroke motorbikes with air or water-cooled engines using foam air filters.

Application

Before applying, make sure to remove dirt, dust and grime so that filter is clean. Pour Motorbike Air Filter Oil into bucket or similar, then place filter into oil and make sure to work the oil into the foam part of filter (use proper hand protection). When filter is completely saturated, remove and let dry for 10-15 minutes. Only work in a well ventilated area.

When working with Motorbike Air Filter Oil make sure that the area is well ventilated.
