

Coolant Ready Mix green

Description

Ready-to-use combination of active agents with antifreeze and corrosion protection components. Glycol-based and free of nitrites, amines, silicates and phosphates. Prevents freezing at outside temperatures to -12 °C and overheating of the cooling system. Enables safe, year-round vehicle operation.

Technical data

| | |
|-----------------------------------------|---------------------------------|
| Density at 20 °C | 1,035 - 1,045 g/cm ³ |
| Solubility | miscible |
| Color / appearance | green |
| Form | liquid |
| Odor | characteristic |
| Shelf life in original sealed container | 36 months |
| Recommended storage temperature | -18 bis +35 °C |

Areas of application

Used for all water-cooled engines in cars, commercial vehicles, buses, agricultural machines and stationary engines and equipment. Note manufacturer's instructions!

Application

Simply add the ready-to-use mixture to the cooling system. Note: Note the vehicle manufacturer's change intervals! Do not mix drained old coolant with other residual material, but instead collect it correctly sorted for recycling.
