

## Liquimate 2C Superglue

### Description

Universal 2-component instant adhesive for rapid, professional repairs. Fills gaps up to 6 mm. Cures fully.

### Properties

- outstanding adhesive properties
- non-drip
- rapid curing
- fills gaps up to 6 mm
- can be processed mechanically
- extremely impact resistant

**Our information is based on thorough research and may be considered reliable, although not legally binding.**

### Technical data

|                       |                                 |
|-----------------------|---------------------------------|
| Color / appearance    | transparent (A), white (B)      |
| Base                  | cyanoacrylate                   |
| Density               | 1,09 (A), 1,17 (B) g/ml         |
| Odor                  | pungent (A), characteristic (B) |
| Flash point           | 80 (A), >100-<160 (B) °C        |
| Viscosity at 23 °C    | 195.000 (A), 63.000 (B) mPas    |
| Form                  | liquid                          |
| Shelf life            | 12 months                       |
| Thermal stability     | -40 to +80 °C                   |
| Final curing at 25 °C | 24 h                            |

### Areas of application

Ideal for various materials such as plastic, rubber, metal, wood, leather and paper. Can also be used on vertical surfaces thanks to its gel-like consistency.

### Comment

To assemble the double syringe, first insert the piston. Then remove the cap and attach the static mixer.

Also available:

Part no. 21470, spare mixer tips

### Application

The surface to be bonded must be clean, dry and free of grease. Apply the adhesive to one of the two surfaces and join it with the other part within 1 minute. The positioning time ranges from 5 – 75 seconds depending on the material. Store the adhesive in a cool, dry place.
