

## LM 145 Lubricant Compound

### Description

Soft, extremely adherent lubricant for open drive elements. The film, which dries thoroughly, is especially suitable for open drives which are exposed to dust, water or weather.

### Properties

- good water resistance
- stable under extreme pressures
- outstanding lubricating action
- good corrosion protection
- outstanding bond strength
- high shear stability
- high resistance to aging

### Technical data

Color / appearance	black
Water resistance at 90 °C	0 DIN 51 807
Base	high-viscosity mineral oil
Operating temperature range	-30 to +110 °C
Lubricants according to DIN 3536	bitumen
Form	aerosol, liquid
Odor	characteristic

### Areas of application

For all lubrication points which are directly exposed to environmental conditions. For lubrication of gearwheels, swing bearings, threaded spindles, chains, wire ropes, guideways and bearings. Used for agricultural and construction machinery, crane and conveyor plants and in shipping and transport companies.

### Application

Apply thinly to cleaned lubrication point. Lubrication intervals will be found in the operation instructions. After use, clear spray nozzle by inverting can and spraying until only the propellant emerges.

### Available pack sizes

300 ml Can aerosol 4020  
D
