

LM 321 HT-Grease

Description

LM 321 HT Grease is a synthetic high-temperature grease for long-life and permanent lubrication of roller and plain bearings which are subjected to high thermal loading. Extremely stable to ageing.

Properties

- good corrosion protection
- good lubricating effect
- high resistance to aging
- wide operating temperature range
- high wear resistance
- outstanding high temperature stability

Technical data

Brief description	KHC2S-35 DIN 51502
Thickener	gel
Base	synthetic oil
Operating temperature range	-35 – 210 °C
Color / appearance	beige
NLGI number	2
Dropping point	without
Base oil viscosity 40°C	430 mm ² /s DIN 51 562
Worked penetration	265 – 295 1/10 mm DIN ISO 2137

Areas of application

Used for blower and fan bearings, bearings in dryer plants in the textile and paper industry as well as stenter frame lubrication.

Application

As usual for greases; do not mix with other greases.

Available pack sizes

400 g Cartridge plastic 4037
D
