

Wire Guide

Description

The long, narrow shaft of the wire counterholder protects the instrument panel and interior decorative trim from damage.

Properties

- simple to use
- makes light work of the job

Areas of application

For the safe removal of bonded front, rear and side windows.

Application

Feed the wire through the hole at the end of the tool, fasten the end of the wire in the hole at half the length of the tool and lock the wire counter holder with the set screw. Move the tool inside the vehicle one centimeter at a time while the person outside cuts while following you. The smooth metal is guided along the decorative trim and instrument panel, thus avoiding damage.
