

Plastic Deep Treatment

Description

Plastic Deep Treatment is a combination of agents which has been formulated to protect, treat and enhance the appearance of all plastic components in the motor vehicle. Plastic Deep Treatment gives the plastic surfaces a matt-silk deep sheen and it also repels dust, dirt and water. By repeated use, badly weathered plastic surfaces can be restored to a pleasing appearance.

Properties

- for internally and externally mounted parts
- produces a matt-silk deep sheen
- repels dust, dirt and water
- simple to use
- protects and cares for all plastics

Technical data

Base	treatment preparation, silicones
Color / appearance	white
pH value	5-7
Density at 20 °C	1 g/cm ³ DIN 51757
Form	liquid
Solubility in water	mixable
Odor	characteristic

Areas of application

Specially developed to protect all plastic surfaces on the motor vehicle such as components in the vehicle interior and on the vehicle exterior, camper vans and equipment, boats, sports items and the household.

Application

Pre-clean heavily contaminated parts. Shake Plastic Deep Treatment vigorously before use. Next, apply evenly to a soft cloth or sponge and lightly rub in to the surface. If necessary, rub again using a dry cloth. Repeat treatment if the surface is badly weathered. Regular application gives the optimum appearance.

Available pack sizes

500 ml Spray bottle plastic 1536
