

Carburetor Housing Cleaner

Description

Carburetor Housing Cleaner is a special mixture of solvents for fast and thorough removal of grease-type contaminants and deposits on carburetors and injection systems such as housings, throttle valves, injectors and bores.

Properties

- good cleaning action
- rapid cleaning
- cleaning possible without dismantling
- economical
- simple to use

Technical data

Color / appearance	yellow
Propellant	propane, butane
Form	liquid, aerosol
Base	mixture of solvents
Flash point	-60 °C
Odor	characteristic

Areas of application

Used for degreasing and cleaning the inside and outside of carburetors and fuel injection systems.

Application

Spray all components which are exposed with the air filter removed and with the engine switched off. Spray external components and allow to dry. Repeat cleaning in extreme cases. Start the engine and allow to run at a moderate speed. Do not spray painted components.

For parts which have been repainted, check paint for compatibility and colour changes by testing on a hidden area.
