Long-term Injection Cleaner

Description

Prevents the formation of carbon deposits and other deposits throughout the entire fuel system, such as on fuel injectors, intake valves, and other fuel system components. Regular use helps maintain engine performance and significantly reduces the risk of damage and associated repair costs. Recommended for use at each refueling.

Properties

- increases operational reliability
- cleans the injection system
- tested for the use with catalytic converters
- for preventive use
- reduces operating costs

Technical data

Base	additive mixture in liquid carrier
Color / appearance	light yellow, clear
Regulation on Flammable Liquids Class (Germany)	A II
Flash point	> 61 °C
Pour point	-45 °C
Form	liquid
Odor	characteristic
Viscosity at 40 °C	<7 mm²/s
Density at 15 °C	0,7989 g/ml

Areas of application

Suitable for all gasoline injection systems.

Application

Add to the fuel accordingly every time you refuel.
10 ml added using the dispensing bottle is sufficient for 10 l of fuel. Mixing takes place automatically.

Available pack sizes

250 ml Dispensing bottle plastic	7531 KK-UK
