

## Tire Fitting Spray

### Description

Prevents damage to tires during fitting and removal. Is economical to use, enables work to be performed quickly, has outstanding creep and lubrication properties and prevents the tire from shifting on the rim after fitting.

### Properties

- high capacity
- outstanding slip properties
- prevents the tire from slipping on the rim after fitting
- optimum penetration properties
- enables work to be performed quickly
- simple to use

### Technical data

Form	liquid
Solubility in water	soluble
Base	synthetic rubber
Color / appearance	white
pH value	8 (20°C)

### Areas of application

For easy and professional fitting and removal of all types of tires on cars, commercial vehicles and motorcycles. Ideally suited for low profile tires and run-flat tires with emergency running properties.

### Application

Shake can briefly before use. Spray on the tire bead and fit/remove the tire as specified. The lubricating film, which is white when applied, acts as an indicator and becomes transparent after a short time. No additional cleaning of the side of the tire is therefore necessary.

### Available pack sizes

400 ml Can aerosol	1658
	D-GB-I-E-P
400 ml Can aerosol	21474
	GB-DK-FIN-N-S
