

## Marine Fuel System Cleaner

### Description

Highly effective combination of cleaning and preserving additives for 2-stroke and 4-stroke gasoline engines. Removes deposits on injection valves, intake valves, spark plugs and in the combustion chamber and prevents new deposits from forming. Improves the engine running, eliminates starting problems and rough engine running. Preserves and protects the entire fuel system against wear, deposits and corrosion. Clean engines consume less fuel and emit fewer pollutants. Protects against the negative effects of water in fuel systems.

### Properties

- saves fuel and reduces pollutant emissions
- removes carbon deposits from intake valves and combustion chamber
- cleans the injection system
- removes deposits from entire fuel system

### Technical data

|   |                |
|---|----------------|
| Form                                    | liquid         |
| Color / appearance                      | yellow         |
| Odor                                    | characteristic |
| Density at 20 °C                        | 0,816 g/ml     |
| Flash point                             | >61 °C         |
| Shelf life in original sealed container | 60 months      |

### Areas of application

For all types of gasoline injection systems and carburetors. For adding to fuel tanks to deal with and prevent problems.

### Application

500 ml is sufficient for 250 l of fuel. Filling the dosage chamber (25 ml) once is sufficient for 12.5 l of fuel.

### Available pack sizes

|                        |                   |
|------------------------|-------------------|
| 80 ml Can sheet metal  | 25048             |
|                        | MXES              |
| 500 ml Can sheet metal | 25010             |
|                        | DE-ES-FR-IT-NL    |
| 500 ml Can sheet metal | 25011             |
|                        | DA-EL-EN-FI-NO-SV |
