Motorsystemreiniger Diesel

Description

Additive combination with a high percentage of cleaning and corrosion protection additives as well as additives ensuring effective lubrication. Removes troublesome deposits from high-precision components, such as injectors and high-pressure pumps, and maintains optimal functionality. Also protects expensive injection-system components through lubricity improvers and corrosion inhibitors. Restores engines to original performance levels.

Properties

- prevents the build-up of deposits
- removes deposits from entire fuel system
- suitable for all diesel engines, including common rail and pumped-jet
- protects injection system components from wear
- prevents seizing and the injector needles from gumming up

Technical data

Base	additive, carrier fluid
Color / appearance	light brown, clear
Density at 15 °C	0,869 g/cm³
Flash point	63 °C
Viscosity at 40 °C	< 7,0 mm²/s
Odor	characteristic
Form	liquid

Available pack sizes

300 ml Can sheet metal	1713 IT
300 ml Can sheet metal	5128 DE-NL
300 ml Can sheet metal	21491 DE-EN
300 ml Can sheet metal	21623 CS-RO-SK
