

Liquid Hand Cleaning Paste

Description

Particularly mild, skin-neutral and paste-like hand cleaner containing moisturizing substances that protect the skin. Removes even stubborn contamination such as oils, greases, brake abrasion, tar, bitumen, paints, etc. Consists to a large extent of renewable raw materials and contains only natural abrasives made from finely ground corn cob meal, which does not block drain pipes and pipelines. Free of solvents and silicone and pH neutral. Thus ensures the preservation of the skin's protective acid mantle. Dermatologically tested.

Properties

- cleans effectively, thoroughly and gently
- protects and cares for the skin
- economical to use
- dermatologically tested
- pleasant odor
- neutral to skin
- outstanding foaming behavior
- multifunctional uses

Technical data

pH value	4,2 - 4,8
Density	~ ca. 1,065 - 1,084 g/cm ³
Viscosity	viscous
Color / appearance	beige
Foaming behavior at 24 °C	good
Odor	characteristic
Form	liquid
Flash point	n.a.
Shelf life in original sealed container	30 months
Shelf life once opened	12 months
Recommended storage temperature	+15 - +25 °C

Areas of application

For cleaning dirty hands.

Comment

SKIN TOLERANCE

Liquid Hand-Wash Paste was subjected to extensive medical skin tests and found to be non-irritant. The product contains a combination of detergent base materials which have been tested and found to be particularly skin tolerant. The product also contains highly effective skin barrier agents.

LEGAL REQUIREMENTS

Liquid Hand-Wash Paste is subject to the Ordinance on Cosmetics, EC Directive on Cosmetics and the Act on Foodstuffs and Goods in Daily Use. The product is not subject to the Chemicals Act or the Hazardous Substances Ordinance.

ECOLOGICAL DATA

Liquid Hand-Wash Paste is not subject to the law on environmental compatibility according to the Washing and Cleansing Agents Act. However, the product complies with this law in regard to the required biodegradability for detergent base materials.

STORAGE

In accordance with the Ordinance on Cosmetics, Liquid Hand-Wash Paste can be stored sealed in its original containers at room temperature for at least 24 months.

OTHER SKIN PROTECTION INSTRUCTIONS

One in three people today suffer from allergies. Skin complaints are the most common form of occupational disease and can lead to an inability to work. The high concentration of harmful substances at the workplace require special protective measures to be taken. The fat and moisture content of the skin are particularly important during the winter months. At this time of year, the humidity is very low since the cold air is unable to carry as much moisture as warm air. During this time, humans do not produce so much cutaneous fat. Hands easily become too dry and cracked which can be seen as a layer of white on the skin. Where they can easily become unprotected, they must be given special care. For this purpose our company supply the product "Invisible Gloves". For information on proper care, see our skin protection plan, Part no. 50713.

Application

Can be used with our dispenser for liquid hand wash paste (part no. 3353).

Thoroughly rub the dispensed amount of hand wash paste into dry hands until the dirt dissolves. Then add a little water and wash thoroughly. Finally, rinse your

Liquid Hand Cleaning Paste

hands well and dry them.
