

## Oil Additive

### Description

Colloidal solid lubricant suspension based on molybdenum disulfide (MoS<sub>2</sub>) in mineral oil. Forms a high-load lubricating film on all rubbing and sliding surfaces. Reduces friction and ensures smoother running as well as greater engine economy. Tested for use with turbochargers and catalytic converters.

### Properties

- reduces oil and fuel consumption
- reduces running-in and operating wear
- no deposits
- highest thermal stability
- absolutely compatible with filters
- miscible with all commercially available motor oils
- increases smooth operation
- outstanding emergency-running properties

### Technical data

Base	MoS <sub>2</sub> -Suspension
Color / appearance	black
Solids content	~ 3 %
Density at 20 °C	0,9 g/cm <sup>3</sup> DIN 51757
Flash point	201 °C DIN ISO 2592
Pour point	-20 °C DIN ISO 3016
Odor	characteristic
Form	liquid
Viscosity at 40 °C	95 mm <sup>2</sup> /s

### Areas of application

Added to the lubricating oil of engines, compressors and pumps. Specially for motor vehicle engines (gasoline and diesel engines). Can be mixed with all commercially available motor oils. Suitable for toothed belts running in oil.

### Comment

The maximum dosage for motorcycles with a wet clutch is 2 %!

### Application

Shake before use. Add 5 % (50 ml per 1 l of oil) to motor oil; in motorcycles with a wet clutch add 2 % (20 ml per 1 l of oil). Can be added to the motor oil at any time.

### Available pack sizes

125 ml Can sheet metal	1011 D-F-NL
