Brake Anti-Squeal Paste (can with brush)

Description

Specially developed lubricating and anti-seize paste made from synthetic and ceramic components. Eliminates squealing noises that occur between brake pistons or contact surfaces and brake pads.

Properties

- good corrosion protection
- outstandingly adherent
- easy to use
- outstanding thermal stability
- resistant to road salt and splash water
- eliminates squeaks
- extremely low friction
- ideally suited as a separating paste

Technical data

Form	pastelike, liquid
Color / appearance	blue
Base	synthetic and ceramic active ingredients
Operating temperature range	-40 to +1200 °C as release agent
Odor	slight
Shelf life in original sealed container	60 months

Areas of application

For installation, repair and maintenance work on brake systems. Used for basic lubrication and as a preventive measure against brake squeal. Highly suitable as a universal paste for numerous applications apart from brake systems.

Comment

Do not apply paste to the friction surface of the brake pad or brake disc!

Application

For floating brake calipers, first clean all sliding surfaces, channels and contact surfaces using a brush or brake file. Next, clean the brake components with Rapid Cleaner (Part no. 3318). After the solvent has evaporated, apply the paste to all sliding surfaces, channels and contact surfaces of the cleaned parts.

Available pack sizes

200 ml Can aerosol	3074 DE-EN-ES-IT
