

## Diesel Additiv

### Description

Prevents the build-up of carbon deposits and residues in the entire injection system such as the injection pump, injectors and in the combustion chamber. Regular use maintains the engine performance and significantly reduces the risk of repairs and the associated repair costs. Suitable for diesel catalytic converters and diesel particulate filters. Recommended for use at each refueling.

### Technical data

Base	additive liquid carrier
Color / appearance	blue
Density at 15 °C	0,844 g/cm <sup>3</sup>
Form	liquid
Odor	characteristic

### Areas of application

Suitable for all diesel injection systems.

### Application

Add to the fuel accordingly every time you refuel. 10 ml added using the dispensing bottle is sufficient for 10 l of fuel. Mixing takes place automatically.

### Available pack sizes

250 ml Dispensing bottle plastic	8335
	DK-N-S-FIN
