

Plastic Restorer Exterior

Description

Freshens up plastics on the vehicle exterior. Maintains and improves faded plastic parts and ensures comprehensive plastic preparation in a single operation. Provides optimum protection against aggressive environmental influences and UV radiation. Contains silicone.

Areas of application

For all unpainted plastic parts on the vehicle exterior.

Application

1. Parts which are contaminated must be thoroughly cleaned with Wash & Protect before treatment. 2. Then pour onto Microfiber Cloth (part no. 1651) or a soft cloth and apply thinly and uniformly using light pressure, working the product into the material well. Make absolutely sure that too much product is not used; repeated application is preferable instead. 3. Allow to dry. 4. Depending on the degree of fading or in the event of an uneven result, repeat the process until the desired result has been achieved.
