

Diesel Particulate Filter Protector

Description

Reduces soot formation during combustion, which improves engine performance and reduces emissions. Reduces premature DPF soot clogging while extending regeneration intervals.

Properties

- regeneration aid for diesel particulate filters
- guarantees optimum combustion
- reduces soot emissions
- especially suitable for short trips and city vehicles
- protects the diesel particulate filter

Technical data

Base	additive combination in carrier liquid
Color / appearance	black, brown, red
Density at 59 °F	0,7989 g/cm ³
Flash point	>63 °F
Viscosity at 104 °F	<7 mm ² /s
Odor	characteristic
Form	liquid

Areas of application

Suitable for use in all diesel engines, with or without turbochargers. Safe for use with catalytic converters and particulate filters (DPF).

Application

For best results and long-term effect add DPF protector every 2.000 km (1.200 miles). Contents (250 mL) is sufficient for 50–70 Liters (14 gal. to 18 gal.) diesel.

Available pack sizes

250 ml Can sheet metal 7703
CANADA-EN-F
