

Liquid Hand Cleaner

Description

Particularly mild, skin-neutral and paste-like hand cleaner containing substances which protect the skin. Removes even stubborn contamination such as oils, greases, tar, bitumen, inks, etc. Consists to a large extent of renewable raw materials and contains only natural abrasives made from finely ground corn cob meal, which does not block drain pipes and pipelines. Free of solvents, pH-neutral and silicone-free. Thus ensures the preservation of the skin's protective acid mantle. Dermatologically tested.

Technical data

| | |
|---|-------------------------------|
| pH value | 6,0 - 6,9 (20°C) |
| Density at 20 °C | 0,82 - 0,95 g/cm ³ |
| Viscosity | ~15 -30 Pas |
| Color / appearance | beige |
| Foaming behavior at 24 °C | gut / good |
| Odor | Orange |
| Form | Paste |
| Flash point | >100 °C |
| Shelf life in original sealed container | 24 months |

Areas of application

For cleaning dirty hands.

Application

Can be used via the dispenser system (part no. 3335) and wall holder (part no. 3332) from LIQUI MOLY. Depending on the system (dispenser dosage), the dosage amount of approx. 3 g or 1 ml is sufficient. Thoroughly rub the hand cleaner into dry hands until the dirt dissolves. Then add a little water and wash thoroughly. Finally, rinse your hands well and dry them.

Comment

Skin compatibility

Comprehensively dermatologically tested and pH-neutral. Made only of the highest quality raw materials. The complex synergistic surfactant system gently cleans while the high-quality lipid agents from natural sources have a moisturizing effect on the skin.

Legal requirements

Subject to the Ordinance on Cosmetics, EC Directive on Cosmetics and the Act on Foodstuffs and Goods in Daily Use, and thus not to the Chemicals Act or the Hazardous Substances Ordinance. An EC safety data sheet is therefore not necessary.

Ecological data

Not subject to the law on environmental compatibility according to the Washing and Cleansing Agents Act. Still complies with this law in regard to the required biodegradability for detergent-based materials.

Storage

In accordance with the Ordinance on Cosmetics, can be stored sealed in its original containers at room temperature for at least 24 months.

Other skin protection notes

One in three people today suffers from allergies. Skin complaints are the most common form of occupational disease and can lead to an inability to work. The high concentration of harmful substances at the workplace requires special protective measures. The fat and moisture content of the skin are particularly important during the winter months due to the low humidity. People also produce less cutaneous fat in the winter. Thanks to the weather, hands easily become too dry and cracked which can be seen as a layer of white on the skin. Skin requires particular care during this period so that it is not unprotected. For information on proper care, see our skin protection plan (part no. 6243).
