

Laminated Glass Repair System Case

Description

Professional repair system for repairing laminated glass. The tool case contains all tools that are required for a professional laminated glass repair in the automotive sector. The individual tools are of a high quality and are extremely stable. The overpressure and underpressure required for the repair is generated in this system by a plastic injector, the plunger of which is screwed into and out of the injector. The simple design of the system guarantees a safe and easy operation. Thanks to the high-quality and extremely low-viscosity repair resin, even the finest cracks are reliably filled. Even stone cracks with fragmentation on the surface or a heavily soiled impact point can be repaired with this system in a first-class manner as even a mini drill for drilling out the impact point is included.

Properties

- optimizes economical use
- simple to use
- very high standard of quality
