Description
This state of the art low-friction motor oil combines fully synthetic base oils and a unique additive technology. The powerful MFC (Molecular Friction Control) technology prevents the formation of deposits while simultaneously reducing frictional losses in the engine. This synergetic effect provides the optimum protection from wear and a flawless running engine. Improvements can be seen in reduced fuel consumption and increased engine mileage. The advanced engineering is further highlighted by the green fluorescent color.

Properties
- outstanding engine cleanliness
- excellent high and low temperature behavior
- friction and wear reducing
- optimum stability to aging
- excellent wear protection
- mixable with most engine oils
- outstanding lubrication reliability
- high shear stability
- compatible for the use with turbochargers and catalytic converters
- instant lubrication after cold start

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required:
ACEA A3 • ACEA B4 • API SN • BMW Longlife-01 (up to 2018) • Fiat 9.55535-H2 • Fiat 9.55535-N2 • Fiat 9.55535-Z2 • MB 229.5 • Opel GM-LL-B-025 • Porsche A40 • Renault RN 0700 • Renault RN 0710 • VW 502 00 • VW 505 00

Areas of application
Asian and American gasoline engines with multi-valve technology and turbo charging benefit most from this product. This oil provides the optimum for effective engine protection and outstanding value conservation, even during long intervals between oil changes and under extreme engine requirements.

Application
The operating instructions of the vehicle and engine manufacturers must be followed. Can be mixed with all commercially-available motor oils. Optimum effect obtained only when used on its own (i.e. no mixing).
