

## Diesel Additiv

### Description

Prevents the build-up of carbon deposits and residues in the entire injection system such as the injection pump, injectors and in the combustion chamber. Regular use maintains the engine performance and significantly reduces the risk of repairs and the associated repair costs. Suitable for diesel catalytic converters and diesel particulate filters. Recommended for use at each refueling.

### Technical data

Base	Additive in Trägerflüssigkeit / additive liquid carrier
Color / appearance	blau / blue
Density at 15 °C	0,844 g/cm <sup>3</sup>
Form	flüssig / liquid
Odor	charakteristisch / characteristic

### Available pack sizes

250 ml Dispensing bottle	8335
plastic	DK/N-S-FIN

**Our information is based on thorough research and may be considered reliable, although not legally binding.**

### Areas of application

Suitable for all diesel injection systems.

### Application

Add to the fuel accordingly every time you refuel. 10 ml added using the dispensing bottle is sufficient for 10 l of fuel. Mixing takes place automatically.
