

Product information

Marine Universal-Cleaner

PI 9/04/04/2019

Description

Specially developed for gently cleaning, maintaining and protecting vessels. The product's special properties guarantee removal of most common contaminants from vessels such as algae, oil and grease residues, soot, bird droppings and insect remains from the sails, decks and hull.

Antistatic components reduce the electrostatic attraction of pigmented dirt particles to plastic surfaces, thus reducing their adhesion and easing their removal. Biodegradable according to the Detergent and Cleaning Agent Law (Germany).

Properties

- excellent cleaning effect
- compatible with plastics, painted wood, rubber, paints
- antistatic, prevents rapid re-contamination
- suitable for polycarbonate
- wide range of applications
- biologically degradable

Technical data

| | |
|--------------------|--------------------------------------|
| Color / appearance | farblos, klar / clear, colourless |
| pH value | 10 DIN 19268 |
| Density at 20 °C | 1,015 g/cm ³ DIN 51757 |
| Odor | charakteristisch / characteristic |

Areas of application

Especially for cleaning and removing soiling on boats.

Application

Spray the cleaner thinly and evenly onto the surface and, applying a minimum of pressure, spread it over the surface with a sponge or brush. Use clean water to wash off the dissolved dirt and cleaner residue. If used properly, the product will not attack plastics such as glass-fiber reinforced plastic, painted wood, rubber, paint, textiles, glass or metals.

Available pack sizes
