## Pro-Line Turbocharger Additive

PI 10/25/08/2020

### Description

Used for the initial filling of new turbochargers in order to protect them against dry running and damage caused by lack of oil after a change in the running-in phase. Improves the operational reliability of the new turbocharger.

### Properties

- outstanding emergency-running properties
- protects against damage caused by lack of oil in the running-in phase
- miscible with all commercially available motor oils
- increases operational reliability

### Technical data

Color / appearance	dunkelgrau - schwarz / dark grey - black
Solids content	~ 10 %
Viscosity at 20 °C	304,31 mPas DIN 51398
Flash point	> 100 °C DIN ISO 2592
Pour point	-15 °C DIN ISO 3016
Thermal stability	> 400 °C
Form	flüssig / liquid
Odor	charakteristisch / characteristic
Density at 20 °C	1,0013 g/cm <sup>3</sup>

### Areas of application

Suitable for all turbochargers. Mixable with all motor oils.

### Application

The oil intake passage of the turbocharger is filled to the brim with Pro-Line Turbocharger Additive before the oil supply line is connected.

### Available pack sizes

20 g Tube plastic	20766 D
