

Product information

Pro-Line Turbocharger Additive

PI 8/28/07/2020

Description

Used for the initial filling of new turbochargers in order to protect against dry running and damage caused by lack of oil after a change in during the running-in phase. Improves the operational reliability of the new turbocharger.

Properties

- outstanding break-in protection
- protects against damage caused by lack of oil in the running-in phase
- mixable with most engine oils
- increases operational reliability

Technical data

Color / appearance	dunkelgrau - schwarz / dark grey - black
Solids content	~ 10 %
Viscosity at 68 °F	304,31 mPas DIN 51398
Flash point	> 212 °F DIN ISO 2592
Pour point	5 °F DIN ISO 3016
Thermal stability	> 752 °F
Form	flüssig / liquid
Odor	charakteristisch / chracteristic
Density at 68 °F	1,0013 g/cm ³

Areas of application

Suitable for all turbochargers. Mixable with all common motor oils.

Application

The oil intake passage of the turbocharger is filled to the brim with Pro-Line Turbocharger Additive before the oil supply line is connected.

Available pack sizes

20 g Tube plastic	22074
	USA (-EN-)
