

## Assembly spray

### Description

Ensures fast and intense cooling of treated components, thereby assisting in assembly work, repairs and troubleshooting. Has an immediate cooling effect and leaves no residues. Special ingredients provide support during assembly work thanks to their lubricating effect.

### Properties

- universal application
- risk of freezing upon contact with the skin
- rapid localized cooling

### Technical data

Color / appearance	farblos / colourless
Base	spezielles Kältemittel / special cryogen
Propellant	Propan, Butan / propane, butane
Flash point	-97 °C
Form	aerosol, flüssig / aerosol, liquid
Odor	charakteristisch / characteristic

### Areas of application

For inserting structural components made of metal such as ball bearings, shafts and bushings in extremely tight spaces. Electrical faults can also be located in components which have been caused by thermal overloading and temperature sensors can be tested to make sure they work. Can also be used for cooling down hot parts.

### Application

Evenly spray components or objects to be treated for a few seconds. The freezing effect can be varied according to the duration of spraying. Product harmless if used properly. There is a risk of freezing on contact with the body.

### Available pack sizes

400 ml Can aerosol	39012
	D-RUS-UA-PL-TR
