Description
Synthetic brake fluid based on glycol ethers and their boric acid esters. It also contains effective corrosion inhibitors and antioxidant additives. Specially developed to extend the operating life of components in the hydraulic brake and clutch systems of motor vehicles. The brake fluid has a high boiling point and wet boiling point, thus ensuring safe braking even after the absorption of some moisture over an extended period of use. Special moisture scavengers help to prevent against the formation of steam bubbles.

Properties
- outstanding thermal stability
- extremely high wet and dry boiling points
- outstanding elastomer compatibility
- highest thermal stability
- outstanding protection against the formation of steam bubbles
- assures a high degree of lubricating action on all moving components in the hydraulic brake circuit
- miscible and compatible with high-quality synthetic brake fluids

Specifications and approvals:
FMVSS 116 DOT 3 • FMVSS 116 DOT 4 • ISO 4925 Class 6 • SAE J 1703 • SAE J 1704

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required:
Audi 501 14 (TL 766-Z) • BMW QV 34 001 • GM Europe GMW 3356 • Seat 501 14 (TL 766-Z) • Skoda 501 14 (TL 766-Z) • VW 501 14 (TL 766-Z)

Technical data
Viscosity at -40 °C 700 mm²/s
Viscosity at 100 °C min. 1.5 mm²/s
Density at 20 °C 1.06 - 1.07 g/cm³
Color / appearance gelb / yellow
Form flüssig / liquid
Odor charakteristisch / characteristic
pH value 7 - 9
Boiling point 268 °C
ERBP, wet > 180 °C
Flash point > 100 °C
Shelf life in original sealed container 24 months

Areas of application
Exceptionally well-suited for use with hydraulic brake and clutch systems in vehicles for which a synthetic brake fluid is prescribed. With its low low-temperature viscosity, this brake fluid is especially suitable for brake systems equipped with modern safety systems such as ESP/DSC, ABS and/or ASR.

Note: Note manufacturer’s instructions!

Application
Can be used with all conventional brake fluid bleeding devices. Miscible and compatible with high-quality synthetic brake fluids. The optimal period of use for this brake fluid is, however, only ensured when it is used alone. It is recommended that the brake fluid be changed in accordance with the specifications from the vehicle manufacturer.

Note: Brake fluid is hygroscopic and must be stored in tightly sealed containers. Reseal the container immediately after opening.

Available pack sizes
250 ml Canister plastic 21166 D-GB
500 ml Canister plastic 21167 D-GB
1 l Canister plastic 21168 D-GB
5 l Canister plastic 21169 D-GB
20 l Canister plastic 21170 D-GB-I-E-P
55 l Drum sheet metal 21171 D-GB-I-E-P
