

Octane Booster

Description

Fuel additive for improvement of the combustion and optimization of the acceleration. Taps the full performance potential of the engine by increasing the octane number of the fuel. The cleaning effect also ensures a clean fuel system and injection nozzles. Protects the exhaust valves of classic cars. Tried and tested in motor sports.

Properties

- increases the octane number
- improves combustion
- Ideally taps the performance potential of the engine
- improves the acceleration
- cleans the fuel system
- cleans intake ports
- Compatible with all gasoline qualities

Technical data

Base	Additiv-Kombination in Trägerflüssigkeit / Additive mixture in carrier fluid
Color / appearance	gelb, klar, transparent / yellow, clear, transparent
Density at 15 °C	0,823 g/cm ³
Flash point	>63 °C
Odor	charakteristisch / characteristic
Form	flüssig / liquid
Viscosity at 40 °C	<7 mm ² /s

Areas of application

Suitable for all passenger cars with 2-stroke and 4-stroke gasoline engines. For the sporty driver.

Application

200 ml can formulated for up to 50 l of fuel. Mix the contents of the can with the fuel. Mixing takes place automatically. Note manufacturer's instructions!

Available pack sizes

200 ml Can sheet metal	21280
	D-F-NL
