

## Surface Disinfection

### Description

Aldehyde- and alcohol-free disinfectant with good efficacy and excellent material compatibility. Leaves no residue on surfaces. Active across a broad spectrum against gram-positive and gram-negative organisms. Effective against all enveloped viruses such as influenza viruses, vaccinia viruses, SARS-CoV-2, HIV, HBV, HCV as well as rotaviruses and noroviruses (limited virucidal according to RKI/DWV guidelines). Limited bactericidal effect.

**Use biocides safely. Always read the label and product information before use.**

### Properties

- aldehyde- and alcohol-free disinfectant
- pH-neutral
- leaves no residues
- VAH-compliant (Association for Applied Hygiene – Verband für Angewandte Hygiene e.V.)

### Areas of application

Ideal for surface disinfection after repair or service in the workshop. Also suitable for home, sports facilities, sunbeds and disinfection of ventilation systems. Compatible with sensitive surfaces such as acrylic, linoleum, PVC and anodized aluminum.

### Application

Remove coarse dirt from the surface to be treated beforehand. Then spray on surface disinfection thoroughly and allow to take effect. Finally, wipe with a cloth if necessary. Observe manufacturer's instructions for aerosol or spray disinfection.

### Comment

The exposure time depends on the desired spectrum of action and is between 30 sec. and 60 min.

### Available pack sizes

1 l Bottle plastic	21628
	D-GB
5 l Canister plastic	21629
	D-GB
