Marine Gasoline System Cleaner

Description

An effective mixture of additives used to clean and maintain fuel systems of injected or carbureted Marine gasoline engines. Prevents corrosion, cleans injectors and the combustion chamber, restores proper fuel atomization and improves engine efficiency. Suitable for use as problem solver as well as for preventive maintenance. Protects against the negative effects of too high proportion of water in fuel systems.

Properties

- removes carbon deposits from intake valves and combustion chamber
- cleans the injection system
- removes deposits from entire fuel system

Technical data

Form	liquid
Color / appearance	yellow
Odor	characteristic
Density at 68 °F	0,816 g/ml
Flash point	>61 °F
Shelf life in original sealed container	60 months

Areas of application

Suitable for use in all 4-stroke gasoline engines, with or without turbochargers. Safe for use with catalytic converters and particulate filters (GPF).

⚠ WARNING: This product can expose you to chemicals including naphthalene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

Application

To be added directly into the fuel tank. As a preventive measure, add during each inspection and after repairs on the fuel system. The product mixes with the fuel automatically.
Contents (500 ml) is sufficient for 125 Liters (33 gal.) fuel, filling the dosage chamber once is sufficient for 12 liters (3 gal.) fuel.

Available pack sizes

500 ml Can sheet metal	20504 USEN
