Product information
Hand Pump

PI 18/09/07/2026

Description
Hand pump supplied with universal hose, metric to U.S. thread adapter for easy filling of outboard engines, transmissions, differentials and other units. Universal use on lawnmowers, ride-on mowers, snow blowers, motorcycle engines and transmissions etc. Fits all LIQUI MOLY 1 Liter containers.

Areas of application
For filling transmissions and other units such as outboard motors, lawnmowers, emergency power units, riding mowers, snow blowers or motorcycle transmissions.

Application
If necessary, cut hose A to the right length at the straight end. The notched end should touch the bottom of the container. Take the short straight hose and insert the end you have just cut into the pump from below. Connect hose B to the hand pump and secure with the clip. Insert the yellow end piece (inch thread) into the hose. The end piece can be adjusted to metric threads using the adapter. Screw the pump onto the container and open the pump lever. Hold the roughly corrugated part and turn the pump lever counterclockwise until it flips up. The pump is now ready to use.

Available pack sizes
1 pcs Bag plastic with Euro holes	29026 DE
