

JetClean Tronic II TD ASR with compressed air connection

Description

Tank cap specially developed for intake system cleaning. Required for some combustion engines in order to deliver the cleaning fluid into the intake system if the intake pipe underpressure is too low using the equipment included in the scope of delivery, such as the spiral hose with ball valve and throttle and the intake system cleaning adapter or intake system cleaning set. Optionally available adapter kit.

Areas of application

Accessory for intake system cleaning with JetClean Tronic II. Can generally be used with all vehicle types during intake system cleaning to facilitate handling and accelerate the cleaning process.

Comment

When used with the pressure tank cap no. 29067, the device may only be operated with clean, filtered compressed air at max. 10 bar. Attention: Make sure you isolate the compressed air supply from the tank cap before opening the cap!

Application

Depending on the type of engine, pour the Pro-Line JetClean Gasoline or Diesel Intake System Cleaner into tank B of the JetClean Tronic II and then seal with JetClean Tronic II TD ASR with compressed air connection. Pressurize the tank with compressed air during cleaning.
