

Product information

Meguin Hydraulikoel HLP 10 AF

Description

Mineral oil which is used as a pressure fluid in hydraulic systems. Contains agents for increasing resistance to aging, corrosion protection and the EP properties. Thanks to the additives, meets all requirements and is predominantly used in hydraulic systems where there are high thermal stresses, where corrosion from water can take place and where the pumps or hydraulic motors require oils with wear protection properties where there is mixed friction due to the operating conditions. This product contains no ash-forming additives, meaning the formation of sticky deposits is avoided when oil is overheated.
