

Liquid Hand Cleaning Paste

Description

Particularly mild, skin-neutral hand cleaner containing moisturizing substances which protect the skin. Removes even stubborn dirt such as oils, grease, brake dust, tar, bitumen, paints, and more. Only contains abrasives made from finely ground corn cob meal that do not clog drains or pipes. Free of solvents, pH-neutral and silicone-free. Thus ensures the preservation of the skin's protective acid mantle. Dermatologically tested.

Properties

- multifunctional uses
- dermatologically tested
- pleasant odor
- protects and cares for the skin
- neutral to skin
- cleans effectively, thoroughly and gently
- economical to use
- outstanding foaming behavior

Technical data

pH value	4,2 - 4,8
Density	~ ca. 1,065 - 1,084 g/cm ³
Viscosity	viscous
Color / appearance	beige
Foaming behavior at 24 °C	good
Odor	characteristic
Form	liquid
Flash point	n.a.
Shelf life in original sealed container	30 months
Shelf life once opened	12 months
Recommended storage temperature	+15 - +25 °C

Areas of application

For cleaning dirty hands.

Comment

Skin compatibility

Comprehensively dermatologically tested and pH-neutral. Made only of the highest quality raw materials. The complex synergistic surfactant system gently cleans while the high-quality lipid agents from natural sources have a moisturizing effect on the skin.

Legal requirements

Subject to the Ordinance on Cosmetics, EC Directive on Cosmetics and the Act on Foodstuffs and Goods in Daily Use, and thus not to the Chemicals Act or the

Hazardous Substances Ordinance. An EC safety data sheet is therefore not necessary.

Ecological data

Not subject to the law on environmental compatibility according to the Washing and Cleansing Agents Act. Still complies with this law in regard to the required biodegradability for detergent-based materials.

Storage

In accordance with the Ordinance on Cosmetics, can be stored sealed in its original container at room temperature for min. 30 months.

Other skin protection notes

One in three people today suffers from allergies. Skin complaints are the most common form of occupational disease and can lead to an inability to work. The high concentration of harmful substances at the workplace requires special protective measures. The fat and moisture content of the skin are particularly important during the winter months due to the low humidity. People also produce less cutaneous fat in the winter. Thanks to the weather, hands easily become too dry and cracked which can be seen as a layer of white on the skin. The skin requires particular care during this time to ensure that it is protected. For information on proper care, see our skin protection plan (part no. 6243).

Application

Can be used with our dispenser for liquid hand wash paste (part no. 3353).

Thoroughly rub the dispensed amount of hand wash paste into dry hands until the dirt dissolves. Then add a little water and wash thoroughly. Finally, rinse your hands well and dry them.

Available pack sizes
