

Pro-Line Radiator Exterior Cleaner

Description

Cleans radiators and air conditioning condensers.
Removes grime and residues such as stubborn sludge, road salt, grease, oil, insect remains, etc.
Protects the engine from overheating and breakdown, keeps the air conditioning system functional for a long time and reduces the risk of associated expensive repairs.

Properties

- protects against overheating
- excellent cleaning effect
- simple to use without disassembly
- prevents expensive repairs

Technical data

pH value	10 (20°C)
Form	liquid
Base	surfactants
Flash point	n.a.
Density at 20 °C	1,06 g/cm³
Solubility	soluble in water
Color / appearance	green
Odor	characteristic

Areas of application

For cleaning and ensuring the operability of coolant circuits and air conditioning condensers.

Application

Shake well before use. Then spray generously on dirty components. Allow to act for 2 – 3 minutes depending on the degree of contamination and rinse off with plenty of water. Repeat the cleaning process for heavy contamination. Contamination residues can be removed with compressed air.

Note: Only use on cold surfaces and do not use when outside temperatures are below 0 °C. Water or air pressure which is too high can destroy the radiator fins. When using on plastics and painted areas, before use check for compatibility on a hidden area.

Available pack sizes

500 ml Spray bottle plastic 3959
