Wheel Hub Paste (can with brush)

Description

Synthetic, metal-free separating paste primarily developed to prevent seizing or rust freezing of the rims on the wheel hub. When used properly, the excellent adhesion properties prevent spin-off, even at high wheel speeds.

Properties

- outstandingly adherent
- easy to use
- outstanding thermal stability
- resistant to road salt and splash water
- outstanding corrosion protection
- eliminates squeaks
- optimum separating effect

Technical data

Form	pastelike, liquid
Color / appearance	blue
Base	synthetic and ceramic active ingredients
Operating temperature range	-40 to +1200 °C as release agent
Odor	slight
Shelf life in original sealed container	60 months

Areas of application

For centering rings on aluminum rims, connection points between rims and wheel hubs, for plug connections and for repair and maintenance work on brake systems.

Application

Remove any heavy dirt, oxidation layers or rust on the contact surfaces and connection points using a wire brush or using an emery cloth. Next, clean the parts with Rapid Cleaner (part no. 3318). After the solvent has evaporated, thinly coat the cleaned areas with the paste. **Note:** Do not apply the paste to the friction surfaces of the brake linings or brake disks!

Available pack sizes

200 ml Can aerosol	4058 DE-EN-ES-IT-PT
