

Pro-Line JetClean Fuel Tank Cleaner

Description

Ready-to-use cleaning additive for cleaning the fuel tanks of all gasoline and diesel vehicles powered with fuel. The cleaning process is performed using the JetClean Tronic unit. Dissolves deposits and contaminants and binds water in the fuel tank as well as in the fuel line system. The fuel system is thus freed from troublesome contaminants.

Properties

- prevents friction corrosion
- cleans the fuel tank and the line system
- binds condensation water
- suitable for all diesel engines, including common rail and pumped-jet
- protects injection system components from wear
- tested for particulate filters and catalytic converters

legally binding.

Technical data

|--------------------|-----------------------------------|
| Form | liquid |
| Base | additives, special liquid carrier |
| Color / appearance | yellow |
| Density at 15 °C | 0,774 g/100g |
| Flash point | -18 °C |
| Viscosity at 40 °C | <7 mm ² /s |
| Odor | characteristic |

Areas of application

For all gasoline and diesel-powered vehicles, including those with common rail and pumped-jet injection systems.

Application

Prior to cleaning, empty the fuel tank using the JetClean Tronic unit following the operating instructions. Then add 1.5 liters of ProLine JetClean Fuel Tank Cleaner (undiluted) to the vehicle fuel tank. Carry out cleaning using the JetClean Tronic unit according to the operating instructions. Establish line connections back to their original state and refill the vehicle fuel tank. Note: The extracted cleaning fluid must be properly disposed of after cleaning. We recommend replacing the vehicle's fuel filter and the filter insert of the cleaning unit following the cleaning procedure.

Available pack sizes

500 ml Can sheet metal 5137
