

Pro-Line Super Diesel Additiv**Description**

A combination of agents which cleans, disperses, protects materials and boosts the cetane number. Formulated for use with modern fuels, including low-sulfur diesel fuels containing biodiesel. The Lubricity Improver provides adequate lubricity for low-sulfur diesel fuel. The increase in ignition performance improves the combustion of the fuel. The high proportion of corrosion protection additives reliably protects the entire fuel system from rust and corrosion. Its excellent cleaning action prevents deposits from forming, keeps components clean, and maintains consistently high engine performance.

Our information is based on thorough research and may be considered reliable, although not legally binding.

Properties

- protects injection system components from wear
- tested for the use with catalytic converters
- increases the lubricating effect
- prevents the build-up of deposits
- guarantees consistently good engine performance
- boosts the cetane number
- prevents seizing and the injector needles from gumming up
- prevents expensive repairs
- excellent cleaning effect
- outstanding corrosion protection
- stable to oxidation

Technical data

Base	additive mixture in liquid carrier
Color / appearance	light brown, clear
Regulation on Flammable Liquids Class (Germany)	A III
Flash point	63 °C
Pour point	-36 °C
Form	liquid
Odor	characteristic

Areas of application

Added to diesel fuel for all diesel engines, including those with pumped jet and common rail injection systems. Also suited for use in stationary engines.

Available pack sizes

1 l Can sheet metal	2801
	DA-EN-FI-NO-SV
1 l Can sheet metal	5176
	DE-EN-ES-IT-PT
1 l Can sheet metal	21690
	HU-PL-RO-TR
