# Description

An effective blend of additives to clean and maintain all common diesel fuel systems. Prevents corrosion, increases lubrication thus reduces fuel pump and injector wear. Increases Cetane value for improved engine efficiency and lowest emissions. Regular use keeps the fuel system in perfect working order and minimizes operating costs.

### **Properties**

- protects injection system components from wear
- prevents expensive repairs
- excellent cleaning effect
- increases lubricating
- outstanding corrosion protection
- increases cetane number
- ideal with catalytic converters
- prevents seizing and injector gumming
- guarantees optimum combustion
- highly economical
- guarantees consistently good engine performance
- stable to oxidation
- prevents build-up of deposits

## **Technical data**

Base	additive mixture in liquid carrier
Color / appearance	light brown, clear
Regulation on Flammable Liquids Class (Germany)	A III
Flash point	145 °F
Pour point	-32 °F
Form	liquid
Odor	characteristic

#### **Areas of application**

Suitable for use in all diesel engines, with or without turbochargers. Safe for use with catalytic converters and particulate filters (DPF).

#### Comment

▲ WARNING: This product can expose you to chemicals including naphthalene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

## Application

To be added directly into the fuel tank, ideal for longterm use with every refueling. Dosage is 1:300, so 1 Liter is sufficient for 300 Liters (80 gal.) of fuel. The product mixes with the fuel automatically. Our information is based on thorough research and may be considered reliable, although not legally binding.
