

Cavity Compressed-Air Can Gun

Description

Powder-coated aluminum container with standard compressed air connection, check valve, flexible nylon probe and angle nozzle. Filling amount 1 liter. The material quantity can be specified exactly by means of a control valve. The air fed into the spray stream causes the spray stream to be very finely atomized.

Properties

- easy to clean
- easy to handle
- variable material quantity

Application

For coating difficult to access cavities with preservation products like Cavity Sealant light brown (Part no. 6108) or transparent (Part no. 6118). Operating pressure 2 -8 bar.

Available pack sizes

1 pcs Carton 6226
D
