Laminated Glass Repair System Case

Description

Repair system for laminated glass repair in a handy case. With all tools that are required for professional repair of minor to moderate damage to laminate glass vehicle windows. The overpressure and underpressure required for the repair is generated by a plastic injector, the plunger of which is screwed into and out of the injector. The simple design of the system guarantees a safe, effortless operation. Thanks to the high-quality, extremely low-viscosity repair resin, even the finest cracks are reliably filled. Even stone cracks with fragmentation on the surface or with a heavily soiled impact point can be repaired with this in a first-class manner as a mini drill for drilling out the impact point is included.

Properties

- optimizes economical use
- simple to use
- very high standard of quality

Areas of application

Professional repair system for repairing minor to moderate damage to laminate glass vehicle windows.

Comment
